POSTMASTERS NAME DIDSBURY MAN PRESIDENT

Edmonton, June 5. (C. P.)—H. Morgan, Didsbury, was re-elected president of the Alberta branch of the Canadian Postmasters' Association here today.

It will be his ninth term of office. Lethbridge was selected for the 1937.

All other officers were re-elected with the exception of Donald Taylor, Vermillion, who was appointed to the executive. Officers are: Vice-president, G. S. C. Paterson, Okotoks; secretary treasurer, Arthur Foulds, Delburne, executive, T. H. Edis, Red Deer; L. Macdonald, Clairmont; and Mr. Taylor.

The meeting chose Lethbridge as the 1937 convention site. The convention ended with a banquet

One resolution asks that the department of marine appoint only one agent to issue radio licenses in each district, that postmasters be given the option of the agency, and that a more rigid enforcement of the act be applied. Another requested the postal department to issue eight-cent postal note stamps. A third resolution expressed "sincere appreciation" of the postmaster general's efforts to abolish political patronage in postal appointments

YOUNGSTOWN—Horses in the district southwest of Youngstown are reported to be suffering from an unusual disease of the throat. The cause has not been ascertained but some think the ailment is by drinking water from dams in which rabbits have died.

INVENTOR OF MARCEL DIES

NEW YORK June 5. (C. P.)—Francois Marcel Grateau, originator of the marcel wave that revolutionized styles in Women's hair dressing, died Tuesday in Paris.

Mr. Hallman held a meet of the Junior Seed Fair, Tuesday evening in the School hall

Lack Of Purchasing Power

One often hears the comment that the prosperity of the cities and towns is dependent upon the prosperity of the farmers, but little is heard of its corollary, namely that the well being of the farmer hinges upon the prosperity of the urban centres, though the one is unquestionably as true as the other.

Possibly the latter has not been heard so frequently in Western Canada as the former because, until very recent times, the farmers' income has been largely derived from an exportable surplus of grain. Under such circumstances the consumer of the bulk of Western Canadian farm products was geographically remote and the fact that the affluence or otherwise of the consumer was of considerable import was but dimly perceived, if recognized at all.

However, this relationship between the Western Canadian producer and the consumer of his products has undergone a change in the past few years and indications are not lacking that the change may be even more accentuated in the next few years.

In the first place, during the past half dozen or so of depression years a substantial percentage of Western Canadian farmers have had little or no income to boast about. Because of a succession of dry years many of them had no crops to sell and others who reaped some wheat or other grains have not received sufficient price to render their work remunerative, partly because of the closing of former markets and partly because of the existence of a big carryover which could not be liquidated, except at tremendous loss.

As a result of their predicament many farmers, even with conditions somewhat more promising, have reduced their acreages seeded to bread grains and are endeavoring to increase their output of other products, including livestock, some of which are finding an outlet to a limited degree in overseas markets and others which, on account of their nature or because of lack of processing facilities, must necessarily be disposed of in local centres.

In the case of those products which are exportable, it is necessary to find new markets or expand existing markets. In the case of products which must be disposed of in local markets, consumption capacity must be increased if the farmer is to be able to dispose of such commodities at a price to yield him a profitable return.

Too frequently, in the past two or three years, farmers have had the experience of hauling or shipping produce to local centres only to find themselves faced with the choice of disposing of them at ruinously low prices or of taking them home again, unsold.

The irony of the situation is that in many cases, perhaps in all of them, the produce would have been welcome in the home of the potential local consumers but, because of conditions which made it necessary for the farmer to raise such produce, these people were unable to buy it, or only at such prices as to render the transaction unprofitable to the producer. In other words, the trouble was lack of purchasing power.

There is no question that local markets are capable of consuming a great deal more local produce if the consumer had the necessary purchasing power and this brings us back to the original statement that the well being of the farmer is dependent upon the prosperity of the urban centres and, so far as Western Canada is concerned, this is much more true than it was a few years ago.

If new local markets can be opened up and the purchasing power of the residents of existing local markets can be increased the problem of the farmer will be at least partially solved.

Fortunately there every reason to hope that the next few years will see the development of new local markets with the discovery of mineral wealth in the northern areas and its development, a process which is being greatly accelerated at the present time.

This, coupled with an increasing influx of tourists from other provinces and the United States give ground for belief that new markets for local products are in the making. That the latter has real potentialities, at present principally enjoyed by Eastern Canada and British Columbia, is evidenced in the recent publication of statistics showing that more money was spent in Canada by tourists last year than was realized by the sale of Canadian export wheat.

As for the expansion of existing local markets that is, as already stated, largely a question of purchasing power and how this purchasing power is to be increased is a question which is giving rise to a great deal of thought. Can it be done by some overt action or can it only be brought about by the ordinary evolution of economic processes?

One quiet student of affairs, whose name has never appeared in print and perhaps never will, suggested to the writer recently that it could be brought about almost overnight if ten or a dozen of the big industrial leaders of the nation would gather around a table and agree to increase salaries and wages all round. "Merchants," he said, "give much thought to the purchase and display and sale of their commodities, but little or none to the other half of their business—the ability of the consumers to buy."

No Time For Number
Bylander—"Did you get the number of that car that knocked you down, madam?"

Victim—"No, but the hussy who was driving it wore a three-piece tweed suit, lined with Canton crepe, and she had on a periwinkle hat, trimmed with artificial cherries."

Just wishing for things to happen never gets you anywhere.

Natives of southern China raise a great deal of rice, but seldom eat it; while peasants of northern China rarely see rice.

"Of course, my dear, she's still very handsome, but you should have seen her 10 or 15 years ago when she was five years younger."

When a man carries a luck piece it doesn't work unless he does.

Maintain National Credit

By Meeting Obligations To The Full
Extent Of Capacity

Members of Canadian Manufacturers' Association meeting at Quebec, lent approbation to the suggestion by their president, W. S. Morden of Toronto, that Canada, by application of "common sense and some old-fashioned methods, should anticipate the coming years with confidence and satisfaction."

The president, in a comprehensive annual review of world economic conditions presented at the annual convention, noted improvement throughout the world generally during the past year.

He was optimistic of the future but with his optimism came a note of warning against too ready spending and loose borrowings by government.

"One feature in connection with the increase of public debt that is giving concern to many individuals and business men," he said, "is the increasing proportion of government obligations that is being acquired by banking institutions. It is, of course, a sound banking theory that when business and industry are depressed and banking funds are abundant, government securities form an ideal investment."

"This theory assumes that when industry and business revive and there is a greater demand on the banks for loans, the government securities can be readily disposed of to the investing public. But it is a necessary implication that the amount of security so held should not be greatly in excess of the capacity of the investing public to absorb. It also is widely felt that if our various governments had to look to insurance, loan and trust companies and private investors as the chief purchasers of their securities the increased difficulty of floating loans would operate as a curb on borrowing."

Mr. Morden said the aim of Canada should be to maintain national credit "by meeting obligations to the full extent of capacity, refunding our debt at lower rates of interest whenever opportunities occur, and reducing expenses."

Steady improvement in conditions made it appear "reasonable to hope that the world, as a whole, is gradually recovering from the great depression, which culminated the progressive economic and trade disasters that followed and had their origin in, or were at least precipitated by, the dislocation of the war."

New Type Electric Bulb

Steam Light Latest Development In Modern Illuminating Methods

A cigarette can be lighted in a jet of steam made by a new type of electric light bulb invented in the lamp development department of the Nela Park laboratory of the General Electric Company in East Cleveland, Ohio.

Details of the new development have been made public. The "steam" light is one result of a revolutionary change in structure of electric light bulbs, made by a new art of welding metal to glass.

The steam bulb is about the size of a large house lamp. Set like a hood over its tungsten filament is a copper coil. This coil develops a jet of steam the size of a lead pencil almost instantly after the light is switched on. A piece of paper held in the jet curls up, smokes and turns to black ash. The steam with this burning power has a temperature of 1,100 degrees Fahrenheit.

The Only Thing Left

At a court function, we are told, Premier Mussolini stopped and picked up a handkerchief which King Victor Emmanuel of Italy and Ethiopia had dropped, and was profusely thanked by the monarch. Well, His Majesty should be grateful. It's about the only thing left he can stick his nose into, states the Windsor Daily Star.

Prince Rides Bicycle

When a Mongol prince, descendant of a long line of hardriding horsemen, abandons his pony for a bicycle, it is news in the frontier settlement of Kweihua, Inner Mongolia. Prince Khang, a leading Mongol dignitary, shocked his compatriots recently by appearing on the main street of Kweihua on a bicycle.

Forgot To Forget

One of our newspaper friends says the Windsor Daily Star brings a good story of the absent-minded professor who had suddenly found himself at a dinner when he didn't want to attend. The professor rambled on something like this: "I didn't mean to attend this affair tonight. I meant to forget to come, and I forgot to forget."

Was Partly Modern

Proclamation Of Coronation Date
Broadcast To Empire

With forms and ceremonies inherited from the immemorial past, the date of the coronation of King Edward VIII. was duly proclaimed in London. But modern science and usage intruded even into medieval pageantry.

When the Earl Marshal, Duke of Norfolk, and his attendants stepped out upon the hoary walls of St. James's Palace, there was immediately in front of them a microphone to carry to the ears of the kingdom at large all that was said in the King's name. The proclamation set the date of the coronation as May 12, 1937. The date was announced in a special issue of the London Gazette.

While a fanfare blared from the silver trumpets of the Horse Guards, the Trumpet Principal King of Arms, with white-gloved hands, unrolled a long scroll nearly a yard wide. In sonorous tones he began his reading. The King's guard of Grenadiers stood at attention, and the great crowd hushed into silence. By means of amplifiers, every sentence was heard distinctly to the farthest limits of the throng. Farther away on the battlemented ivy-clad walls of the palace, stood members of the King's personal household.

Sir Gerald read the proclamation, "Declaring His Majesty's pleasure touching his royal coronation and the solemnity thereof." The reading took nearly 10 minutes. It opened with a reference to "the favour and blessing of almighty God" and spoke of "our princely care for the preservation of the lawful rights and inheritances of our loving subjects."

Big Prize For Air Race

Race From England To South Africa
In September

Sir Alan Cobham announced that I. W. Schlesinger, South African millionaire, has given £10,000 (\$50,000) prize money for the proposed air race from England to South Africa to coincide with the British empire exhibition at Johannesburg.

Schlesinger is promoting the race with Cobham, himself a pioneer long-distance flyer, as consultant. The Johannesburg exhibition opens Sept. 15 and will run until Jan. 15, 1937. The air race proposal has the approval of the British air ministry and the South African government has promised every assistance.

Entire organization of the race will be undertaken by the Royal Aero Club of Great Britain and participation will be limited to British empire pilots and aircraft. In this respect it will differ from the London-to-Melbourne race of 1934 which was open to all-comers.

Cobham said Schlesinger's motive in arranging the event was the promotion of commercial aircraft and the furtherance of air interest on the part of citizens of the British empire. But chiefly, he said, the race was intended to focus attention on the Johannesburg exhibition.

Feather In Your Cap

Phrase Originated From Custom
That Is Almost Universal

This phrase means that something is an honor to you. The allusion is to the very general custom in Asia and among the American Indians of adding a feather to the headgear for every enemy slain. The "ancient" Lydians, and many others had a similar custom, and it is still usual for the English sportsman who kills the first woodcock to pluck out a feather and stick it in his cap. The custom in one form or another seems to be almost universal. In Hungary at one time one might wear a feather but he who had slain a Turk, and it will be remembered that when Cossack quelled the Talaip rebellion he was honored by the Chinese government with the "yellow jacket and peacock's feather."

New Comet Found

Will Be Visible To Naked Eye Late
Next Month

The new Pettier Comet, first to be found this year and first to be visible to the unaided eye since 1927, will swing into the range of vision late in July, Harvard College Observatory announced.

Still 120,000,000 miles from the earth, the comet has increased its apparent brightness from ninth to eighth magnitude in four days and by the end of July, before it starts to recede, it will be brighter than sixth magnitude and within 20 million miles.

To Have and to Hold

Men who are wedded to the practice of "rolling-their-own" honour and cherish Ogdens'. They KNOW that Ogdens' Fine Cut is a mighty pleasing tobacco, that it's always mild and soothing—the cigarette tobacco "to have and to hold." Now that better times are here, roll-your-owners everywhere are picking Ogdens' because Ogdens' is better. The package is better, too—because it has the purple easy-opening ribbon for removing the Cellophane. "Chanticleer" or "Vogue" papers are the ideal mates for such a grand cigarette tobacco.

OGDEN'S FINE CUT

P.S.—Your Pipe knows Ogdens' Cut Plug.

SELECTED RECIPES

SHORTCAKE BISCUITS

4 cups flour
4 teaspoons Magic Baking Powder
1½ teaspoon salt
4 tablespoons shortening (½ butter, ½ lard)
1 tablespoon sugar
Milk, sufficient to make soft dough, about 2½ cups
Sift together three times flour, baking powder and salt. Cut in the shortening. Add sugar, mix well. Add milk to make soft dough. Turn on floured board. Pat or roll lightly to 1" thickness. Cut rather larger than ordinary. Bake in oven 250 degrees F. 15 to 20 minutes. When done split and spread with creamed butter. Put between biscuits some crushed and sweetened strawberries. The biscuits may be covered with whipped cream, and the juice from the fruit poured round the dish or served at the table as many people do not like the short cake biscuits soaked with juice.

A Leytonstone, Eng., confectioner constructed a cake model of Westminster Abbey. The model weighed a ton.

She: You think more of that old wireless set than you do of me.
He: "Well, I get less interference from it."

Famous Canadian Artist

Homer Watson Dies In His 81st Year
At His Home In Ontario

Homer Watson, one of Canada's outstanding artists, died at his home near Kitchener, Ont., in his 81st year. He had been ill for several months.

In the same rural community where he died, Homer Watson was born in 1855 and began his art career without tuition of any kind.

In 1880 the Marquis of Lorne purchased "The Pioneer Mill," exhibited by Watson at the Royal Canadian Academy. This painting and another of Watson's early works, "Last of the Drought," went to the private collection of Queen Victoria. Watson's fame spread and he made several trips to England, exhibiting with the famous artists of his day.

His outstanding contribution to the history of the Great War was his panoramic "Valcartier Camp," done under assignments by the Canadian government in 1914.

A train ferry will soon enable railway passengers to go from London to Paris without leaving the train.

It is estimated that a person has approximately one chance in 3,388 of being killed outright in an automobile accident.

TABER CROPS HIT BY FROST

TABER, June 5 (Special Dispatch) -- Alex. Bibothkyr of Russian settlement south of Grassy Lake, had 160 acres of wheat destroyed by Tuesday night's frost and further wheat losses there are feared. Potatoes and garden stuff were blackened at the Fleming farm five miles southeast of Taber. The edges of Thin Lake were frozen Thursday morning.

Obituary

MRS. A. G. AULD

Mrs. Annie Grace Auld, 78 years of age, well known resident of Youngstown district before going to Calgary in 1935 died in a local hospital, Sunday evening, following a lengthy illness. She had resided at Norwood Apartments,

Born in Middlesex County, Ont., the late Mrs. Auld moved to Oxbow, Sask., in 1904, residing there for eight years before moving to Youngstown district. She came to Calgary in 1935.

Surviving are three sons, Bruce G. of Cogan B. C., John F. of Youngstown, and W. C. of Calgary; two daughters, Mrs. W. Watts, of Elm Creek, Man. and Mrs. James Reid, of Squamish, B. C., and two brothers, James L. Chapman, of Michigan, and Richmond, S. Chapman, of Vancouver.

Funeral Services were conducted at Calgary Wednesday afternoon.

Mr. J. E. Cooley is a Calgary business visitor this week.

Vancouver's Golden Jubilee

Fifty years ago the first trans-continental Canadian Pacific Railway train from Montreal reached the Pacific Coast. This summer Vancouver, now the Gateway to the Orient and port for ships of the entire world, will celebrate the Golden Jubilee of its founding as the western terminal of the Canadian Pacific Railway. Commencing July 1 with Dominion and International Good Will Week, the programme concludes with the Canada Pacific Exhibition on September 7, and includes land and water sports, several weeks of grand pageantry, musical attractions, visit of American warships, a two-day air show with a solo flight across Canada planned as the highlight, floral decorations, visit of 15,000 Sailors in mid-July, traditional pageantry of an Aldershot tattoo, frontier week, street dancing and costume balls, and historical exhibits arranged to illustrate Vancouver's steady progress during the first half century of its existence.

Even before the beginning of the celebration proper, many colorful events will be given recognition, including Empire Day and horticulture show in May; Pioneer's festival on June 11 to 14; golf tournament, King's birthday, and religious observances.

One of the highlights of Vancouver's celebration will be the re-enactment of the arrival of the first Canadian Pacific train, almost half a century ago. The venerable old engine, first to the coast, will be run again, with its original pilot, W. H. Evans, at the throttle. Some of the old-timers who saw the first train arrive will also be present for the ceremony. The Canadian Pacific Railway will run tours at low cost from Eastern Canada to the Pacific Coast for the event, with stop-over privileges at Banff Springs Hotel, Chateau Lake Louise, and other famous Rocky Mountain resorts.

Pictures show the old and the new Vancouver, and Sir William Van Horne, second president of the Canadian Pacific Railway, who chose the name of Vancouver in 1881 for the western terminal of the first trans-continental railway line.
